

CSP2	Spiny lobster sightings	Results Form
------	--------------------------------	---------------------

This form asks you to record the depth below sea level (bsl) of any spiny lobsters *Palinurus elephas* which you may encounter on your dives at Lundy. Ideally, take a photo* of any spiny lobsters you see (even if it's just of their antennae poking out of a rock crevice). Make sure you also record the GPS position of your dive (from the dive boat) and the mid-time of your dive, so that you can subtract the predicted tide height at that time to give your depth below chart datum (bcd).

* Photo file name must include: subject (species name if known)_site name_your name_date

Name of Recorder: **Date:**

E-mail:

Site name (if known)	GPS position	Depth (bsl)	Time at mid-dive	Depth (bcd)		
Description of sighting (how many and approx. sizes)		Have you attached a photograph/s?				
[Text field/180 characters max.]		Yes	[Tick]	Number?	No	[Tick]

Site name (if known)	GPS position	Depth (bsl)	Time at mid-dive	Depth (bcd)		
Description of sighting (how many and approx. sizes)		Have you attached a photograph/s?				
[Text field/180 characters max.]		Yes	[Tick]	Number?	No	[Tick]

Site name (if known)	GPS position	Depth (bsl)	Time at mid-dive	Depth (bcd)		
Description of sighting (how many and approx. sizes)		Have you attached a photograph/s?				
[Text field/180 characters max.]		Yes	[Tick]	Number?	No	[Tick]

Site name (if known)	GPS position	Depth (bsl)	Time at mid-dive	Depth (bcd)
